

## Bathroom and art

A meeting point of different artistic experiences: that's the way we can define the exhibition Bathroom and Art which took place in Bologna last September during the last edition of **Cersaie**. Protagonists in the magnificent frame of the San Martino Theater hall, six originals and unusual couples of authors. Precisely, the products of seven factories producing bathroom furniture (Duravit, Fir, Regia, Jacuzzi, Parigi, Scirocco H and Titan-Creative Corner) together with the artworks of three talented Italian artists (*Paola Bitelli*, *Alessandro Moreschini* and *Antonio Riello*).

The result of these unusual couples, were some extraordinary and uncommon scenic interpretations of the bathroom ambiance and its contemporary cultural meaning. Moreover, an excellent soundtrack has perfectly sealed this meeting between design and art in order to propose a multilevel sensational use of the exhibition. The music was played from **Associazione Bassesfere** of Bologna (created since 1993 to promote the development of the improvised music). The event, was also organized in association with **Dams** (Disciplines for Arts, Music and Show) of **Bologna University**, also supported from Bologna town-hall, Culture sector\*.
